The W/P blaze is a painted rectangle with white on the top and purple at the bottom. The W/Y blaze has white on the top and yellow at the bottom. The white (W) blaze is a white rectangle marking the original very well engineered mountain bike trail. Hikers should respect these trails by stepping aside to allow any bikers to pass. Bikers should also respect the hiking trails, by only using the 100% combo loops. The B/O trail on this loop is a wide old dirt road that is easy to share.
